

Don't Get Caught!

National 2G GSM Network Shutdown to occur from 1st December 2016

Legacy 2G GSM Data Logger Upgrades

Legacy 2G GSM Product Upgrades.

Many Authorities still operate “legacy” 2G GSM / GPRS based data logging equipment. The pending national shutdown of all GSM networks mean that Authorities must put strategies in place now to mitigate against risk of service disruption when the GSM network shutdown occurs.

Don't get caught! - Key Benefits to moving from 2G GSM Based Hardware now include:

Feature / Function	2G GSM Based Products	Site Sentinel® and Metermade® Products:
High-reliability DNP3 Time Stamped Data	DNP3 Supported by Very few existing GSM / GPRS based Products	YES – All products support DNP3
Guaranteed Data Delivery / Connection QoS	GPRS – Generally NO SMS - NO	YES - Guaranteed Data Delivery and QoS over 3G networks
Support for 3G / 4G Comms upgrade	Generally No Upgrade Path (equipment end of life)	YES – 3G as standard, Core product platform supports future upgrade path to 4G and beyond.

Talk to the Experts.

Contact 37South for:

- Advice on existing equipment upgrade paths to Site Sentinel® and Metermade® 3G-DNP3 data logging equipment.
- Advice and discussion on your specific Application and Deployment requirements, including risk mitigation strategies.
