REMOTE DEVICE MANAGEMENT

## **M1-001**

The M1 is a waterproof, utility and environmentally-focused variant of the Site Sentinel® data logger and RTU family, providing integrated float switch and highly-reliable direct-to-host data monitoring in a single package, designed to operate in the field for up to ten years on a single set of batteries (based on one report per day).

The Site Sentinel® M1 enables high or low alarm level monitoring of sewer and drainage manholes or tanks.

This data is stored internally on non-volatile flash memory with upstream communications provided using an internal 4G cellular modem, permitting use on CAT-M1 and NB-IoT networks worldwide. Host compatibility is ensured with integrated support for DNP3.0 and FTP Protocols. Complete control is handed to the user to allow custom data reporting and wake-from-sleep regimes to be configured to balance battery life against data reporting requirements.

Remote configuration and device management is supported via leading industry SCADA applications. Remote firmware download capability is provided by FTP file transfer.

The device is housed in a low-profile, robust ABS-plastic enclosure, UV stabilised and rated at IP68 allows for direct installation into manholes and is capable of withstanding immersion of four metres for four continuous days. Internal and external antenna connections are standard.

The M1 suits a wide range of utility and environmental alarm level monitoring, such as sewer and drainage manhole high level alarm monitoring, water tank high/low level alarm monitoring and lift station backup monitoring.

## **Technical Specifications**

General

Supply Voltage 3.5 - 8.5 V DC, High-capacity, internal Lithium battery pack (field replaceable)

Current Draw 50 µA sleep, 5 mA active, 200 mA cell communications, 2 A (peak) cell network detect

Internal - Year, month, day, hour, minute, second, Automatic DNP3 time synchronisation from master, Real Time Clock

Automatic cellular network time sync or NTP time sync when using FTP data export

Temperature -20°C to +85°C Celsius

Humidity 0 to 90% relative humidity, non-condensing

Windows based Configurator M+ configuration software, Remote device management via DNP3, Programming

Remote firmware download via FTP, local programming port (inside unit), live local diagnostics

90 mm (h) x 125 mm (d, nominal) / 155 mm (d, maximum), supplied with stainless steel mounting bracket Mounting

and installation kit that includes O-Rings, O-Ring Grease and antenna

Environmental IP68 (4 metres depth/4 days duration)

**IO Interfaces** 

Internal 'magnetic swipe' function to request on-demand data updates by field personnel, **Digital Input** 

1x integrated float switch with weight, sealed to IP68, 5 metre cable length, user selectable float polarity N.O/N.C

Internal measurement of Cell Network RSSI, RTU temperature, RTU battery voltage and session status code

**Telemetry** 

System Input

Supports World-wide 4G/LTE Cat-M1 / NB-IoT Bands: B1, B2, B3 (1800 MHz.), B4, B5, B8, B12, B13, B18, B19, B20, 4G Cellular

B25, B26, B27, B28 (700MHz.), B66, B71, B85. Class 3 Output Power (+23dBm)

Internal antenna / External SMA Female connector, user selectable Antenna

SIM Card 1.8 and 3V UICC (Standard size SIM card)

DNP3.0 slave unsolicited mode, FTP data export Data Protocol

Host Support True TCP support to DNP host (supports three Master IP addresses)

CHAP or PAP authentication, SIM credentials, configurable username, password and APN, built in IP firewall, Security

512-Bit AES Encrypted firmware download

**Approvals** 

Build

Standards RCM (AUST/NZ), EMC compliance, other export standards on request

Production Proudly Made in Australia

**Factory Accessories** 

Each device is supplied with a battery, stainless steel quick release mounting bracket and installation Standard Accessories

A comprehensive range of factory manufactured or sourced accessories to ensure reliable and swift solution **Optional Accessories**
